Qualification Pack

ELE/N3101: Engage with customer for service

Description

This NOS deals with customer interactions by identifying issues, scheduling visits, preparing for service, verifying warranty, gathering appliance details, explaining findings, suggesting solutions, and obtaining consent for repairs

Scope

The scope covers the following :

- Introduction and Interact with the customer
- Suggest possible solutions

Elements and Performance Criteria

Introduction and Interact with the customer

To be competent, the user/individual on the job must be able to:

PC1. Interact with customers to diagnose air conditioner issues, identifies and fixes minor faults or replaces modules, and recommends factory repair for major problems

PC2. analyse the details of customer complaint registered at customer care or installation schedule

PC3. connect with the customer to use mobile CRM apps and real-time service tracking system to interact professionally with customers and provide personalized support.

PC4. collect appropriate tools, parts, relevant reference sheets, manuals and documents

PC5. visit the customer premises as per the scheduled date and time for service as per the requirement

PC6. check about warranty status of appliance and annual maintenance contract

PC7. gather detailed information pertaining to age of appliance, status of upkeep, symptoms and history of problems in the appliance

PC8. provide information to the customer about the warranty and problem in detail along with the precautions to be taken in order to avoid recurrence of problem

Suggest possible solutions

To be competent, the user/individual on the job must be able to:

PC9. suggest possible solutions with the time required, costs involved and methodology for servicing

PC10. seek customer’s approval on further action

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understanding of basic air conditioner components, functioning, and common faults

KU2. Knowledge of diagnostic procedures to identify minor and major faults in appliances.

KU3. Awareness of customer care processes, complaint registration, and service scheduling

KU4. Understanding of warranty terms, annual maintenance contracts, and their implications.

KU5. Knowledge of using mobile CRM apps and real-time service tracking systems for professional interactions.

KU6. Familiarity with service manuals, reference sheets, and relevant technical documentation.

KU7. Awareness of tools, spare parts, and equipment required for AC servicing.

KU8. Knowledge of preventive maintenance practices and precautions to avoid recurrence of problems.

KU9. Understanding of cost estimation, service methodology, and time management for tasks.

KU10. Awareness of professional communication standards when interacting with customers.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Ability to interact politely and professionally with customers.

GS2. Skill in collecting and analysing detailed information about appliance history and symptoms.

GS3. Capability to assess the severity of issues and recommend appropriate action (repair, replacement, or factory service).

GS4. Proficiency in using digital tools like mobile CRM apps for real-time updates.

GS5. Skill in preparing and organizing necessary tools, parts, and documentation before service.

GS6. Time management to visit customers as per scheduled appointments.

GS7. Ability to explain warranty, service details, and precautions clearly to customers.

GS8. Competence in suggesting solutions, including methodology, costs, and time required.

GS9. Skill in obtaining customer approval for further actions.

ELE/N3108: Perform installation and repair of air conditioner

Description

This NOS is about understanding the installation or repair requirements for air conditioners, perform the tasks at customer premises to achieve the required productivity and quality

Scope

The scope covers the following :

- Perform pre-installation checks
- Install the air conditioner
- Analyze symptoms, identify and rectify faults
- Complete documentation

Elements and Performance Criteria

Perform pre-installation checks

To be competent, the user/individual on the job must be able to:

PC1. analyze the work requirements by interacting with the supervisor

PC2. plan to visit customer premises to understand the installation position of air conditioner such as window, split, high, low, etc

PC3. check that the location meets structural requirements such as distance from power supply, distance from windows/doors being opened frequently

PC4. inform customer about any pre installations/masonry/electrical work to be carried out

PC5. mark position for placement of indoor/outdoor units to get customer confirmation on position and installation on next visit

Install the air conditioner

To be competent, the user/individual on the job must be able to:

PC6. remove the air conditioner packaging without causing any damage and ensure that it matches the customer order in terms of colour and make

PC7. check that all supporting accessories are available in the pack

PC8. inspect that tools and fitments required for the installation are available

PC9. dispose off the packaging material waste as per company’s norms

PC10. measure the location to drill holes ensuring that no internal wiring damage takes place

PC11. Install using smart tools (digital manifold gauges, vacuum pumps with Bluetooth), inverter ACs, window AC and Split AC

PC12. place the outdoor unit at a suitable location and attach it firmly to wall/floor

PC13. connect the indoor and the outdoor units using the field copper pipe of appropriate size and interconnecting cables

PC14. fill in additional gas if the distance between the indoor and the outdoor units is more than what is recommended

PC15. align the air conditioner as per the instructions manual and make necessary power supply connections

PC16. demonstrate the features/utility to customer for the new installation while explaining the precautions to be taken while using the air conditioner

Analyze symptoms, identify and rectify faults

To be competent, the user/individual on the job must be able to:

PC17. analyze usage pattern of the air conditioner from the customer

PC18. diagnose the fault based on customer interaction and initial inspection by carrying out basic tests such as power supply inspection,volt ampere test, etc.

PC19. separate and inspect every module of the unit if the fault is not identified through basic tests

PC20. plan to send air conditioner to factory for in-depth diagnosis, if problem cannot be identified at site

PC21. repair or replace faulty part as per requirement at customer location or send it to service center on time in case immediate repair is not possible for specialized parts such as PCB

PC22. plan second visit to replace dysfunctional module/part after collecting it from service center

PC23. carry out brazing operation at the customer premise or pass the complaint on to a specialist in-charge of handling brazing, if the fault identified is a gas leak

PC24. reassemble the unit after rectifying identified fault

PC25. check that all the modules of the unit work as per specifications and confirm functionality to the customer

PC26. collect necessary payment from the customer as per rate sheet/ communication from customer care and provide the receipt

Complete documentation

To be competent, the user/individual on the job must be able to:

PC27. fill in customer acknowledgement form and seek customer's signature

PC28. complete documentation for recording installation/repair of air conditioner and update the company ERP software for tracking/future references

PC29. inform customer care and supervisor about job completion

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. Understanding of different types of air conditioners (split, window, inverter) and their installation requirements.

KU2. Knowledge of structural, electrical, and safety requirements for AC installation.

KU3. Awareness of pre-installation checks and site assessment procedures.

KU4. Familiarity with tools, accessories, and smart instruments such as digital manifold gauges, vacuum pumps, and other installation equipment.

KU5. Understanding of handling, packaging, and transportation precautions for AC units.

KU6. Knowledge of interconnection methods, piping, gas charging, and electrical wiring for indoor and outdoor units.

KU7. Awareness of basic diagnostic methods, tests, and fault identification techniques for AC units.

KU8. Knowledge of repair/replacement procedures for faulty modules, including brazing and specialized parts handling.

KU9. Understanding of customer service procedures, payment collection, and communication during installation and repair.

KU10. Familiarity with documentation practices, ERP software updates, and company norms for waste disposal and service tracking

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. Ability to analyze work requirements and plan pre-installation checks effectively.

GS2. Skill in interacting professionally with customers to explain installation needs and obtain approvals.

GS3. Competence in marking, measuring, and aligning AC units accurately according to manuals.

GS4. Ability to handle and install AC units safely without causing damage.

GS5. Proficiency in using smart tools and carrying out installation tasks (mounting, piping, wiring) correctly.

GS6. Capability to diagnose faults systematically using basic tests and inspection.

GS7. Skill in repairing or replacing faulty parts on-site or coordinating with the service center efficiently.

GS8. Time management to plan visits, follow-ups, and second visits for module replacement.

GS9. Professional communication and documentation skills to update records, ERP software, and obtain customer acknowledgment.

GS10. Maintaining safety, quality standards, and customer satisfaction throughout installation and repair.

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

KU10. how to compute income and expenses
KU11. importance of maintaining safety and security in financial transactions
KU12. different legal rights and laws
KU13. how to operate digital devices and applications safely and securely
KU14. ways to identify business opportunities
KU15. types of customers and their needs
KU16. how to apply for a job and prepare for an interview
KU17. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicate effectively using appropriate language
GS2. behave politely and appropriately with all
GS3. perform basic calculations
GS4. solve problems effectively
GS5. be careful and attentive at work
GS6. use time effectively
GS7. maintain hygiene and sanitisation to avoid infection

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.

2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.

3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.

4. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below).

5. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre based on this criterion.

6. To pass the Qualification Pack, every trainee should score a minimum of 70% of aggregate marks to successfully clear the assessment.

7. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack.

Minimum Aggregate Passing % at QP Level : 70

(**Please note**: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory) trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended) trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.

Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.
